

# Women's Care

## at Research Medical Center

*Research Medical Center offers family-focused, comprehensive care that will enhance your birthing experience from conception, throughout your pregnancy and after you deliver.*

### **Family-Focused Maternity Care**

We believe family-focused care includes the family's educational needs from conception through discharge for you and your baby. We recognize family individuality and promote interaction between the family and infant to provide a complete circle of care.

The Parent Review is a free weekly e-mail service we offer to pregnant patients to offer information and support during your pregnancy. The service offers helpful tips, practical information and parenting resources.

### **High-Risk Pregnancies and Deliveries**

Our nursing staff is experienced in handling obstetrical cases that require additional knowledge and specialized training. We provide a Level III Neonatal Intensive Care Unit (NICU) in the event your baby needs a higher level of care upon delivery. The NICU is designed with the latest technologies and has the specially trained staff to support newborns with respiratory difficulties or other high-risk complications.

### **A VIP Package Especially for You**

Let us pamper you during your stay at Research Medical Center with our VIP Package. The VIP Package is offered to each woman who delivers their baby at Research Medical Center. The Package includes special extras such as Room Service for the patient and significant other, a gift basket, a robe and slippers for mom, a "Birthday Celebration," and more. See the reverse side of this flyer for complete details.

### **Pre-registration Program for Your Convenience**

Our Pre-registration Program helps streamline the hospital admitting process with individual appointments to familiarize you with the Women's Care unit and the hospital facility. Paperwork is taken care of before you are admitted, so you can concentrate on the excitement of your new baby's arrival!
